The Stock Market HIGH GRADE IS UNCOVERED ON

Propertyl at Randsburg Shows Eighteen Inches Ruby Silver In Bottom Shaft

A wire received has night from Albert Kelly, who is in San Frangisco, contains the information that There has been uncovered eighteen wonarch Pittsburg03 .04 ... inches of high-grade one in the bot tom of the shafe that has attained .15 .17 a depth of 260 feet. Former advices were to the effect that specks of ruby silver had been putting in their appearance and it's evident that the management has broken into something out of the ordinary in a mineral

> Drifting north and south is being prosecuted on the 200 level, and h is reported authoritatively that the showing in the south drift is encouraging and that a bug ven of conmercial grade ore is exposed. - The north drift is looking exceptionally good also, and it is quite evident that the Ben Hur Divide company is developing a producer that will be making a big noise in the not far i distant future

Production Will Be Augmented Within Short Time That Promises Big

The Tonopah North Star Mining! company continues an aggressive campaign of development with a satisfactory ore production. However, It will probably be only the matter of a short time until the susper of the mine will be substantially angmented by reason of the fact that the scope of operations is gradually being enlarged A drive is being made towards the Belmont claim and excellent headway is resulting in the breaking of ground and a fine-look me body of ore is in evidence. Freduction at the present time is being confined to the raise from the 500

Drift 1077, off 1050 level, is following a splendld body of ore that has been exposed for a length of about fifty feet, but no effort is being made to extract the material, pending the completion of a raise known as 1132 This raise will permit of economical ore extraction and within a short time conditions will be such that a much heavier tonnage can be produced at a minimum of expense

WILSON DIVIDE TO BEGIN OPERATIONS

The campaign of developmen' that has been mapped out for the development of the Buckhorn property at Stone Cabin, which was recently taken over by the Wilson Divide Mining company, promises to be prolific of results at an early date. Since the holdings were provided with hoist and other necessary equipment matters have been shaped up for a thorough campaign of development.

Operations are being prosecuted on the 160 level and a splendid ore showing is in avidence. It is the purpose of E. P. Cullinan, moving spirit in the corporation, to shortly proceed with the sinking of the shaft with a view or determining the persistency of the ore shoots which seems to be assured. The ore now exposed on the 160 here! shows values running into the hendreds of ounces in silver a ton, while most of the dump matter can be handled at a fair margin of profit in the event that a mill is provided to eliminate long transportation haut.
